

SYNTHETIC A-FOAM %3

Foam produced from combinations of hydrocarbon surfactants; high-volume stable bubbles. It is used in all types of solid fuels (paper, textiles, wood ...) in fast filling of depots, in mines and in the burning of partial ventilated areas, or in industrial stored combustible gas leaks .

Application

A-Foam %3 foam concentrate is very important for paper, wood, textiles and organic based solid materials fires. A-Foam %3 is effective for extinguishing and securing flammable hydrocarbon and polar solvent fires.

Technical Data Sheet

- Can be used for Class A and Class B fires.
- Can be used with sea or fresh water.
- Does not contain toxic substances.
- Storage / Shelf life is 4 years within storage conditions.
- Easily cleanable from the surface with water.
- Manufactured accordingly TS EN 1563-3, CE and TSE certificated

Specific Gravity at 20°C	1100 +/- 100 Kg/m ³
pH	7.5 +/-1
Viscosity at 20°C	10-15 cp
Storage Conditions	- 15°C / + 66°C
Freezing Point	- 15°C
Use Concentration	% 3
Foam Drainage %50	8 min
Suspended sediment	< %1
